Patient Name: Atison Gasma Age/DOB: 46yo Gender: Date: 8-7-78
Weight: 79.200 Height: 1.80 BP: 137/91 Temperature: 37.100 Pulse: Respiratory:

Rechecked

Complaints, History, Diagnosis, Investigations, Medications.....

PC: Dizziness + 3/7

The client is being managed pulmonary embolism, and is on Lasix and started on antihypertensive, which is reacted - nervous - and was changed

She had a strong spell after 1hr of taking the new antihypertensive. Dizziness was similar to what caused and resulted in the diagnosis of pulmonary embolism.

On journey was associated with hot flashes, had palpitations as well but there was no fatigue, sweating + no associated any chest pain.

Dizziness was not rotating but dizziness while she had stood up from a sitting position. The dizziness never came again.
