REF CONSULTANAT		DATE	31/07/2018

Radiograph of the chest (single view)

Clinical history: Left sided chest pain

**Findings:**

There is mild rotation.

Apparent small nodular densities are seen overlying the right hilum presumed to be en face appearance of the vessels. Clinical correlation suggested to exclude other causes.

The heart, mediastinum and pulmonary hila are unremarkable.

The lungs are clear.

There is no pleural effusion. No obvious pneumothorax.

The bony thorax is intact.

**Impression:**

No acute cardiopulmonary process.
