Patient:	ERNEST OWUSU	Requester:	TWUMASIWAA MEMORIAL CLINIC
Patient Number:	1031523	Patient Type:	---
Date of Birth:	1978/01/29		

Study: US Abdomen

**Clinical Information:**

Liver disease

**Report:**

Liver is echogenic but of normal size and with smooth surface and regular margins. No focal lesion seen. It measures about (14.7) cm at the MCL. No intra or extra hepatic biliary ductal dilatation seen. Gallbladder shows no calculi or sludge.

The spleen and pancreas are normal with the spleen measuring about () cm.

The right and left kidneys measures about (10.5x4.5) cm and (9.3x4.6) cm respectively. Both show good cortico-medullary differentiation. No calculi or calyceal dilatation seen.

No mass or ascites seen in the peritoneum.

Great vessels appear normal in caliber.

**Imp:**

Echogenic but normal size liver. DDx: Fatty infiltration, chronic hepatitis.
