

Quest Medical Imaging RADIOLOGISTS

Dr. Andrew Kaminta
MBChB (UGMS), FWACS, FGCPs

Dr J.W. Bergman
M.B.ChB(UCT), FCP(SA)PAEDS, F.F.RAD(d) (SA)

Dr J.L. Ross
M.B.ChB(UCT)F.F.RAD(D)(SA)

Patient: Miss Mensah Daniels, Leighanna Dionne
Status: Out Patient.
Date of Birth: 11-Aug-2003
Acc: QX0005501
Date of Exam: 17-Oct-2018
Institution/Ref Doc Gilead Medical & Dental Centre

CHEST X-RAY

Findings

The lungs are clear with no air space disease, nodules or masses and no evidence of an interstitial infiltrate.
The major airways appear normal.

There are no pleural effusions or pleural thickening.

There is no evidence of hilar or mediastinal adenopathy.

The heart and pulmonary vasculature appear normal.

The thoracic cage and soft tissue envelop are normal.

Comment

No evidence of pulmonary or cardiovascular pathology.

Normal Chest radiograph
