Name: Alhassan Amina

Age: 40yrs

Gender: Female

Clinical History: Has prolonged menses with prior history of uterine fibroids

Type of Investigation: Abdominal Ultrasound

Investigation Date: 17/08/2018

ULTRASOUND REPORT

The uterus is anteverted, homogeneous in echopattern and mildly enlarged measuring (8.9x5.3x6.1cm) cm and contains two small intramural nodules at the posterior wall measuring 1.5x1.1cm and 1.5x1.3cm. Normal endometrial stripe thickness measuring 5.4mm.

No fluid collection in the pouch of Douglas.

The left ovary is enlarged measuring about 6.1x3.7cm and contains a thin-walled cyst with internal septations measuring 4.1x3.7x3.7cm (vol=30.1ml).

The right ovary is normal in size and echogenicity measuring 3.2x1.4cm. No discrete mass or abnormal fluid collection noted.

The urinary bladder is normal with no calculus or masses noted.

Impression:

- Mildly Enlarged Uterus with Multiple (about 2) Small Intramural Fibroids
- Features Suggestive of Left Ovarian Hemorrhagic Cyst.

Sonographer: Rosemond Adu-Sarkodie
