Name: Nana Segbawu Bota

Age: 38yrs

Gender: Female

Clinical History:

Indication:

Type of Investigation: Breast Ultrasound

Investigation Date: 17/09/2018

ULTRASOUND REPORT

Right Breast

- There are multiple well-defined small anechoic lesions at various segments of the breast and measuring as follows;
 1. 6 O' clock region at the Areolar margin, measuring about 2.0x1.6x1.3cm
 2. 7:30 region..... about 5cm from the nipple, measuring about 1.1x2.0x1.0cm
 3. 8 O'clock region..... about 6cm from the nipple, measuring about 0.9x0.9x0.7cm
 4. 9 O'clock region about 4cm from the nipple, measuring about 2.1x1.8x1.2cm
 5. 12 O'clock region.....about 4cm from the nipple, measuring about 0.7x0.7x0.7cm
 6. 11 O'clock region..... about 4cm from the nipple, measuring about 0.6x0.6x0.5cm
 7. 1 O'clock region.....about 2cm from the nipple, measuring about 1.2x.1.0x0.9cm.
 8. 12 O'clock region..... at the areolar margin, measuring about 2.1x.1.8x1.0cm
 9. 3 O'clock region.....about 1cm from the nipple, measuring about 0.6x0.5x0.4cm and
 10. 2 O'clock region.....about 1cm from the nipple, measuring about 0.6x0.5x0.3cm.
- Also noted at the areolar region of the breast are multiple dilated lactiferous ducts with some measuring about 3.8mm and 3.5mm.
- No calcifications noted.
- No sonographic evidence of abscesses.
- Normal overlying skin thickness
- There are multiple benign-appearing lymph nodes at the right axilla.

Left Breast

- There are multiple well-defined small anechoic lesions at various segments of the breast and measuring as follows;
 1. 1 0' clock regionabout 3cm from the nipple, measuring about 2.5x2.6x1.7cm
 2. 2:30 region..... about 6cm from the nipple, measuring about 1.9x1.7x1.2cm
 3. 3 0'clock region..... about 2cm from the nipple, measuring about 1.2x1.0x0.7cm
 4. 3 :30 region about 4cm from the nipple, measuring about 0.7x0.6x0.5cm
 5. 4 0'clock region.....about 4cm from the nipple, measuring about 1.2x1.0x0.9cm
 6. 4:30 region..... about 5cm from the nipple, measuring about 1.0x0.9x0.8cm
 7. 3:30 region.....about 5cm from the nipple, measuring about 0.4x0.3x0.9cm
 8. 3 0'clock region..... about 4cm from the nipple, measuring about 0.5x0.4x0.4cm
 9. 8:30 region.....about 2cm from the nipple, measuring about 0.8x0.6x0.5cm and
 10. 9 0'clock region.....about 3cm from the nipple, measuring about 0.8x0.7x0.5cm.
- Also noted at the areolar region of the breast are multiple dilated lactiferous ducts with some measuring about 3.5mm and 3.5mm.
- No calcifications noted.
- No sonographic evidence of abscesses.
- Normal overlying skin thickness
- There are multiple benign-appearing lymph nodes at the left axilla.

Impression:

- Bilateral Multiple Small Breast Cysts
- Features Suggestive of Bilateral Breast Cysts
- Bilateral Axillary Lymphadenopathy (Benign-Appearing).

Sonographer: Rosemond Adu-Sarkodie
