

**GILEAD MEDICAL AND DENTAL CENTRE**  
**HOUSE OF BALM, No. C896/3 Kanda Highway**  
**North Ridge –Accra**

Name: Raju Sonavene

Age: 41yrs

Indication: R/O Right ureteric stone. Acute appendicitis

Date: 13/09/2018

**ULTRASOUND REPORT**

The appendix was not visualized.

Liver: Homogeneous and of average size measuring about 13.8cm. No focal mass, diffuse disease or surface nodularity noted. No dilated intra or extrahepatic ducts noted.

Gall Bladder: Contracted (? Post-prandial state)

Pancreas: The visualized portions of the pancreas is of normal sonographic appearance.

Spleen: Homogeneous and of average size measuring about 9.2cm. No focal mass noted.

Both kidneys show good corticomedullary and sinus differentiation measuring Rt=9.7x4.4cm and Lt=9.9x4.8cm. No focal mass, calculi or hydronephrosis noted.

Both ureters were sonographically not visualized.

Normal sonographic appearance of the abdominal aorta and IVC.

No intra-abdominal mass or fluid noted.

Prostate: Homogeneous and of average size measuring about 4.4x3.2x2.9cm (vol=21.8ml) with smooth and intact capsule. No focal mass or calcification noted.

Urinary Bladder: Uniform wall thickness with normal outline. No intraluminal pathologies noted.

Pre-void urine volume = 199.0ml

Post-void residual volume = 14.3ml

**Impression:**

- Non-Visualization of the Appendix but right lower quadrant pain  
Acute Appendicitis can however not be ruled out.  
Kindly correlate with clinical findings

- Average-sized Prostate of size 21g with Residual Urine volume of 14.3ml.

Sonographer: Rosemond Adu-Sarkodie
