

ASIWOR BENDELWOR, 56 YRS

### THORACIC SPINE

The thoracic vertebrae show endplate sclerosis, reduced joint spaces and marginal osteophytosis of the articular surfaces.

Normal vertebrae body heights and paravertebral soft tissue.

### LUMBOSACRAL SPINE

There is straightening of the normal lordosis from pain due to spasm of the back muscle.

The lumbosacral vertebrae show endplate sclerosis, reduced joint spaces and marginal osteophytosis of the articular surfaces.

Normal vertebrae body heights and paravertebral soft tissue.

### CONCLUSION

1. Thoracolumbar spondylosis.
2. Lumbago.
