PLAIN RADIOGRAPH-LUMBAR SPINE REPORT

There is loss of lumbar lordosis. There are osteophytes on L2 to L5 vertebrae. The L3/L4 disc spaces are reduced. There is a slight posterior slip of L3 over L4 vertebra.

The vertebral body heights and posterior elements are normal.

There is no fracture or spondylolisthesis

Impression:

Lumbar spondylosis with degenerative disc disease, details as above

Grade 1 retrolisthesis of L3 over L4 vertebra
