Name: Kofi Kwafo

Age: 52yrs

Gender: Male

Clinical History:

Indication:

Type of Investigation: Pelvic Ultrasound

Investigation Date: 08/01/2019

ULTRASOUND REPORT

The prostate is homogenously enlarged measuring about (5.7x4.9x4.3cm) approximately = 63.9cm³ with smooth and intact capsule. No focal mass or calcifications noted.

The urinary bladder wall is not thickened. The Urinary bladder appears normal with normal outline. No focal mass or calcifications were seen in it.

Post void residual bladder volume = 536.6cm³

Post void residual bladder volume = 39.7cm³

Both kidneys measure Rt=10.7x3.9cm and Lt=10.9x5.1cm and show mild dilatation of the pelvicalyceal system and ureters. No focal mass or calculi noted.

Impression:

- Homogeneously Enlarged Prostate Gland of size 63g with residual urine volume of 39.7cm³
- Mild Bilateral Hydronephroureters.

Sonographer: Rosemond Adu-Sarkodie
