Name: Damaris Naa Koshie Pimpong-Quartey      Age: 36yrs      Gender: Female

Clinical History: Recurrent Miscarriages

Type of Investigation: Pelvic Ultrasound

Investigation Date: 24/01/2018

### **TRANSVAGINAL ULTRASOUND REPORT**

The uterus is anteverted, homogeneous in echopattern and mildly enlarged measuring (9.5x6.0x4.6cm) cm and multiple small (about 4) intramural nodules at the anterior and posterior walls measuring 3.2x2.3cm, 1.5x0.9cm, 1.3x0.9cm and 1.3x0.7cm. Also noted at the cervical region are multiple small anechoic lesions with some measuring 0.6mm, 0.7mm and 0.5mm in diameter. Normal endometrial stripe thickness measuring 7.7mm.

The right ovary is enlarged measuring 5.2x3.3x2.8cm (vol=26.2ml) and contains thin-walled unilocular cyst measuring 3.1x2.3x1.8cm (7.2ml).

The left ovary is also enlarged measuring 4.3x2.9x2.9cm (vol=20.0ml) and contains a well-defined thin-walled unilocular cyst with diffuse low-level internal echoes measuring 2.9x2.8x2.3cm (vol=10.3ml). The lesion shows normal flow on color Doppler interrogation.

The urinary bladder is normal with no calculus or masses noted.

#### **Impression:**

- Mildly Enlarged Uterus with Multiple Small Intramural Fibroids
- Simple Right Ovarian Cyst
- Left Ovarian Cyst with diffuse low-level internal echoes
  - ? Chocolate Cyst (Endometrioma)
  - ? Hemorrhagic Ovarian Cyst
- Nabothian Cysts
