Name: Afua Serwa Adosinaba Age: 40yrs

Gender: Female

Clinical History: Left-sided pain

Type of Investigation: Abdomino-Pelvic Ultrasound

Investigation Date: 19/03/2017

ULTRASOUND REPORT

Pelvic

The uterus is anteverted, homogeneous in echopattern and enlarged measuring (12.2x7.5x4.8) cm and contains multiple (about 4) small intramural nodules at the anterior and posterior walls measuring 1.6x1.4cm, 1.5x1.0cm and 1.3x0.9 and 1.6x0.9cm. One of the nodules has a calcified rim. No intrauterine gestation noted. Normal endometrial stripe thickness measuring 4.5mm. No endometrial collection or calcification noted.

No fluid collection in the pouch of Douglas.

The ovaries are normal in size and echogenicity measuring 3.2x1.3cm and 3.7x2.0cm for right and left respectively. No discrete mass or abnormal fluid collection noted.

The urinary bladder is normal with no calculus or masses noted.

Abdomen

The liver is of average size, measuring 14.7cm MCL with homogenous echopattern. No focal mass or diffuse lesion noted. No intra or extrahepatic bile duct dilatation.

The gallbladder shows normal outline and wall thickness. No gallstones, sludge or mass seen. No pericholecystic fluid seen. Absent sonographic Murphy sign.

The visualized portions of the pancreas is of normal sonographic appearance. No pancreatic calcification.

The spleen is normal in size and echopattern measuring 9.2cm. No focal mass or diffuse lesion

Both kidneys are of average size measuring, right (11.5x3.9) cm and left (11.7x4.5) cm respectively with good corticomedullary differentiation and normal renal sinus. No focal loss of renal parenchyma. No hydronephrosis, calculi or focal mass noted.

No ascites, abdominal mass or lymphadenopathy. There is normal abdominal aorta and IVC.

Impression:

- Enlarged Uterus with Multiple Small Intramural Fibroids (one having a calcified rim)
- Normal Abdominal Ultrasound.

Sonographer: Rosemond Adu-Sarkodie
