PC - Cough - 1/2

Hx: Cheryl is a known hypertensive and diabetic for the past 10 years. She is on Co-chran and Combigrize and apparently has been well until above symptoms started. She is been seen at another centre she developed the cough a month ago and says she has Zinnat and Augmentin but she is still coughing. Cough is productive of sputum - greenish but non copious and non offensive. There is no blood streak, nor frank hemoptysis. She reporting for dental case and became toothless. Daniel was asked to be removed. Says fss - normally around 8pm - use no night loss, doenching night contact with chronic cough person.
