Name: Cynthia Kwashie

Age:43yrs

Gender: Female

Clinical History: Raised Serum Thyroglobulin

Type of Investigation: Thyroid Ultrasound

Investigation Date:05/06/2018

### **ULTRASOUND REPORT**

Noted in the right lobe of the thyroid gland are two small hypoechoic nodules measuring about 0.8x0.4cm and 0.6x0.3cm. The nodules are noted to have cystic changes. The nodules show no flow on color Doppler interrogation.

Both lobes of the thyroid gland are homogeneous and of average size measuring 3.8x12.4x1.0cm and 3.1x2.4x1.0cm for right and left respectively.

Normal sonographic appearance of the isthmus measuring 3.0mm in A.P diameter.

The thyroid gland shows normal flow on color Doppler interrogation.

No retrosternal extension noted.

No lymph nodes noted at the cervical region.

Normal sonographic appearance of surrounding vessels and muscle.

Normal sonographic appearance of surrounding structures.

### **IMPRESSION:**

Features Suggestive of Nodular Thyroid Disease.
