Investigation Date:19/02/2018

ULTRASOUND REPORT

There is a single intra uterine gestational sac.

Yolk sac present.

No fetal pole seen within it.

GS = 5Weeks 0Day

Noted at the superior aspect of the gestational sac is a subchorionic collection.

Also noted at the anterofundal and posterior aspect of the body of the uterus is an intramural nodule measuring 5.0x4.2cm and 2.5x1.6cm respectively.

The left ovary is of normal sonographic appearance and average size measuring 3.3x2.3cm.

The right ovary was not visualized.

No adnexal mass noted.

Os is closed.

IMPRESSION:

- A single intra uterine gestation at 5Weeks 0Day with Subchorionic Bleed.
- Multiple (about 2) Intramural Fibroids.

Suggestion:

- Repeat Ultrasound after a month for viability and dating

Sonographer: Rosemond Adu-Sarkodie
