Name: Abigail Kpenu

Age: 31yrs

Gender: Female

Clinical History: lower abdominal pain, scanty menses

Type of Investigation: Abdominal Ultrasound

Investigation Date: 27/04/2018

ULTRASOUND REPORT

The uterus is anteverted, homogeneous in echopattern and of average size measuring about (11.4x6.3x3.9cm). No focal mass or intrauterine gestation noted. The endometrial stripe thickness shows the trilaminar appearance, consistent with the proliferative phase and measures about 11.9 mm.

The right ovary is in the pouch of Douglas, of normal sonographic appearance and average-sized measuring 3.6x1.3cm. No focal mass or abnormal fluid collection noted.

The left ovary is also of normal sonographic appearance and average size measuring 3.9x2.1cm. It also contains a dominant follicle measuring about 26.1mm in diameter. No focal mass or abnormal fluid collection noted.

No fluid collection in the pouch of Douglas.

The urinary bladder is normal with no calculus or masses noted.

Impression:

Normal Pelvic Ultrasound.

Sonographer: Rosemond Adu-Sarkodie
