Name: Nancy Twumasi Asaimah

Age:41yrs

Gender: Female

Clinical History:

Type of Investigation: Thyroid Ultrasound

Investigation Date:03/09/2017

ULTRASOUND REPORT

The right lobe of the thyroid gland is enlarged measuring about 3.9x2.5x2.1cm (vol=10.2ml) with coarse parenchymal echopattern. No focal mass noted.

The left lobe of the thyroid gland is of average size measuring 3.1x 1.7x1.5cm (vol=4.7ml) but shows coarse parenchymal echopattern. No focal mass noted.

The isthmus is also coarse measuring 4.3mm in A.P diameter.

The thyroid gland shows normal flow on color Doppler interrogation.

No retrosternal extension noted.

There are multiple benign-appearing lymph nodes at the cervical region.

Normal sonographic appearance of surrounding vessels and muscle.

Normal sonographic appearance of surrounding structures.

IMPRESSION:

Enlarged Right Thyroid Gland with Bilateral Parenchymal Inhomogeneity as described above

? Thyrotoxicosis
